PROFILE

As an eager and enthusiastic fresher, I'm committed to embracing continuous learning and applying diverse methods to drive my personal growth while making meaningful contributions to the organization's success.

EDUCATION

B.C.A   2020 – 2023
Sacred heart college Madanthyar   Karnataka, India

FREELANCING   EXPERIENCE

Movie Reviewer | React , Tailwind CSS , Firebase   06/2023 – 07/2023

- Designed a user-friendly interface to enhance the user experience and encourage easy navigation.
- Leveraged Tailwind CSS to create a visually appealing and responsive design, ensuring a consistent look across devices.
- Utilized React to build dynamic components and improve interactivity, providing a smooth and engaging user experience.
- I integrated Firebase authentication for added security and user convenience. This strengthened data protection and made registration and login processes even smoother.

Shopify(E-commerce) | React , Redux Toolkit ,Tailwind CSS , Firebase ,RazorPay | 03/2023 – 05/2023

- Prioritized user-friendliness, focusing on intuitive design choices to enhance the overall user experience.
- Implemented a robust "Add to Cart" functionality using Redux, enabling users to easily select and manage their food orders.
- Leveraged Tailwind CSS to create an aesthetically pleasing and responsive design, ensuring a consistent and visually appealing user interface.
- Utilized React to build dynamic and interactive components, providing a smooth and engaging user experience throughout the app.

PROJECTS

Mechanic Shop Finder ✎

- Created the app's user interface using React.js and Tailwind CSS, making it more interactive and user-friendly.
- I utilized the dynamic MERN stack, combining MongoDB, Express, React, and Node.js, for robust application development and showcased expertise in state management with Redux Toolkit.
- Implemented an admin dashboard for overseeing the application and a shop dashboard for managing shop-related requests efficiently.
- Within the app, users can easily request services, view their bills, and make payments through the integrated Razorpay platform.

URL Shortner App ✎

- Crafted a website that looks good and works well on any device.
- Used Express and MongoDB to handle the behind-the-scenes work and store data for the website.
- Added a feature allowing users to personalize their URLs by adding custom words after the domain name.
- Created user excitement with an engaging shimmer effect during data loading, fostering heightened engagement.

TECHNICAL SKILLS

Languages : HTML , CSS , JavaScript , TypeScript
Frameworks : React, Node Js, Express Js , Next Js , Tailwind CSS , Framer Motion
Developer Tools : Git, VS Code
